COMMERCIAL PROPOSAL

ASG Card x402 on Stellar + PayAI

Product overview and commercial framing for a joint pilot: monetize AI-agent API calls via x402, settle in USDC on Stellar, and align a facilitator-ready execution path with PayAI.

Product Overview

- **x402 Paid Endpoints:** deterministic pay-and-retry flow for paid API actions.
- **Facilitator Path (PayAI):** mediated verification and settlement orchestration.
- **Virtual Cards + Stellar USDC:** issue and fund cards on demand after payment confirmation.

Core Use Cases

- AI procurement agents paying for SaaS, data, and compute.
- Enterprise copilots with delegated card controls and auditability.
- B2B API providers monetizing pay-per-action flows.
- Cross-border operator teams settling spend in USDC.

PLATFORM	VALUE	WHY IT MATTERS
Stellar	More USDC settlement demand from AI-commerce transactions.	Demonstrates real payment utility in agent-native workflows.
PayAI	Facilitator adoption in production-like partner scenarios.	Accelerates x402 commercialization through a concrete integration path.
ASG Card + Partners	New transaction revenue line with low integration friction.	Faster pilot-to-scale motion with measurable monetization KPIs.

Suggested Pilot Structure

1. **Week 1-2:** Integration setup, success criteria, and KPI baseline.
2. **Week 3-4:** Controlled pilot with payment conversion tracking.
3. **Week 5-6:** Scale decision based on usage and revenue performance.

Primary CTA: Launch a joint pilot and align KPI targets across product, BD, and operations.
